

A huge choice of innovative ovens.

The oven is no doubt one of the most important appliances in your kitchen. Choosing the right oven to suit the space you have and the way you want to cook is key to the success of your new kitchen.

Single and double ovens

A single oven has a combined grill and is ideally suited for installation in-column or beneath a hob.

A double oven is installed at eye level which is the most convenient working height. The two cavities mean you can use the oven and the grill at the same time, or you have a second oven, perfect for everyday meals or entertaining friends and family.

If you want the convenience of a double oven but do not have the space, then the built-under double ovens are the perfect solution. Cleverly designed to replace a single oven and its housing, they offer double cavity cooking in the space of a single oven.

Insight range

The unique 'light bar' makes this product a focal point in any kitchen - packed with features to offer you many different cooking options.

Including:

- Multi-function with up to 10 functions
- Temperature probe
- Menu guided cooking and interactive cooking displays
- Plus at this level you will also discover, pyrolytic, auto-cooking and Electrolux's unique heat and hold feature

Inspire range

A stunning Global Design featuring glass fascias and a linear look.

Including:

- Electronic clocks on all models
- Some ovens feature catalytic liners to make cleaning that little bit easier

Intuition range

Features the fresh Global Design - complementing today's modern kitchens.

Including:

- Fan oven
- 'A' energy rated

We were thinking of you when we designed our brand new range of double ovens. All our appliances are now 'A' energy rated in both oven cavities for the very best efficiency, saving you money. All single ovens are 'A' rated for the very best efficiency.

Oven Features

We present appliances with design, features and performance in a class of their own. We have got all the features you could wish for because we were thinking of you when we developed these appliances. We were thinking of making your kitchen life a little bit more relaxed and fun.

Light bar

Creates a soft look, and a focal point in the kitchen with this stunning light bar and design, to complement today's modern kitchens.

Interactive/menu guided display

With interactive 'Vision' control the oven can guide you through your cooking process. It makes programme selection simple. It also has built-in recipes to make life even easier.

If you want to leave the cooking to someone else you can even programme your favourite dish in to the oven and all the timings will be held. This feature also tells you when to clean your oven.

Safety for you and your family

The inner and outer panes of glass in our oven doors are heat reflective, and depending upon the model chosen, two, three or four panes of glass are used in total to ensure the outer door temperature is cooler. This reduces the risk of injury, giving you peace of mind, as well as making the oven more economical to use. Thoughtful features like auto-stop, anti-tip shelves ensure your oven is safer to use.

Baking chart

In some Insight single ovens there is a baking and cooking function guide which helps you to choose the right way to cook your food.

Oven Cleaning

Pyrolytic Cleaning - ovens that clean themselves

It's the only cleaning function that cleans all of the oven - top, sides,

back, door, light and oven base - plus it's efficient, and extremely safe to use with the oven being designed around the pyrolytic function - rather than the other way round.

- Pyrolytic ovens remove the need for you to spend your time cleaning your oven by hand
- It is more friendly to the environment as you do not need to use cleaning products on your oven

Catalytic liners - to help your oven stay clean

A special Catalytic coating is used on many of the ovens which absorbs any splashes during cooking to help keep the oven cleaner. When the oven is set to its highest temperature the special coating then helps clean off the splashes.

Easy to clean enamel

With a durable high gloss enamel interior making it easier to wipe away grease and spillage immediately after cooking. The construction of the door in single ovens allows you to remove the door and the glass for very easy cleaning.

Oven Functions

Are you a person who has a passion for cooking and who loves to entertain friends and family with the result? Electrolux offers a wide range of functions that will help you to cook the perfect meal, just the way you like.

Multi-Function

Allows you to choose fan cooking, conventional cooking and grilling, as well as combining other oven functions such as the pizza setting. They're all combined in one oven to make your life easier.

Ultrafan°

An Ultrafan® oven makes use of a fan to gently circulate the heat evenly around the oven. The fan is at the back of the oven surrounded by a heating element. This clever design gives faster heat up times, shorter cooking times at lower temperatures and an even cooking temperature throughout the oven. As well as being ideal for batch baking, or cooking on more than one shelf, it ensures there is no transfer of flavours, so sweet and savoury dishes can be cooked together.

The fan simply circulates the air around the oven. This allows you to defrost food quickly and hygienically in half the time without having to use a microwave.

Conventional Cooking

This method of cooking is perfect for your favourite recipes to be cooked in the traditional way, using top and bottom heating elements. This makes it particularly good for cooking pastry, cakes or for one shelf cooking.

Turbo grilling

This gives an authentic spit roast effect without needing to baste or turn the joint. It combines the grill and the fan to give a crisp but tender result.

Pizza setting

This is the ideal way to ensure a nice crispy base with a succulent, melted topping every time.

Uses a low temperature to gently cook food. Ideal for casseroles and joints.

Perfect for browning dishes such as shepherd's pie or lasagne.

Ideal for crisp pastry bases, reheating food, and if used at a low temperature, for warming plates.

Quickly heat your oven to the required temperature saving you time.

Single and dual circuit grill

All ovens offer traditional grilling with variable control. The dual circuit grill may be used on the economy setting when grilling smaller items as it only uses part of the grill.

The temperature probe allows you to measure whether the joint is ready without even opening the oven door. It takes the guess work out of meat cooking and is ideal for Beef Wellington. Whilst this isn't a method of cooking for most people, you'll soon be so used to a perfectly cooked joint, you'll wonder how you ever managed without it.

/// Keep Warm

A great, unique feature which is aligned to today's busy lifestyles - this function keeps food warm in the same way a hostess trolley would - maintaining the temperature at 80 degrees to prevent drying or condensation build up.

Heat + Hold

Heat + Hold is selected before you start cooking and automatically switches to a set 30 minute 'keep warm' function at the end of cooking. This function is used in conjunction with the timer. Ideal for guests who may be running late.

A multifunction oven with Auto Cooking... be the cook of your dreams.

Do you aspire to the results achieved by TV chefs? Mouth watering foods that look like they've come straight out of the pages of a magazine? It's called Auto Cooking - simply prepare your chosen recipe and let the oven do the rest. Now create food you could only dream about.

Choose your cooking category

Ideal for traditional home baking, be it the Victoria Sandwich or German Strudel to apple pies or home-made bread.

Loin of pork, duck or a well done beef joint or lamb - pink, take the guess work away, just select the required taste.

Convenience food

From frozen to fresh ready meals, from pasta to pastry to potatoes, cook or reheat to perfection.

Oven dishes

Great dishes like potato gratin, soufflés, rice or bread and butter pudding - just like grandma made.

Whether your pizza is freshly homemade, pre-prepared, thick, thin, or even calzone - auto cook delivers fantastic

Inspiro not only knows how to cook, but also cleans itself thanks to the Pyrolytic auto cleaning system. Once the Pyrolytic function has been selected, the oven heats up to 500°C and burns off the most stubborn cooking residues, leaving only a light ash, which can be easily wiped away with a damp cloth. Pyrolytic cleaning is also more friendly to the environment as you do not need to use cleaning products.

Tasty technology

Electrolux have a solution with Auto Cooking - simply choose the cooking category, select the desired menu option and follow the on-screen instructions.

We were thinking you might want to be in control with the 10 heating functions allowing you to cook manually.

Smell control filter

The smell control system is ideal for today's modern open plan living. It's selectable, minimises unpleasant smells and is maintenance free as it cleans itself.

We were thinking

of you and your environment with our advanced heat cleaning Pyrolytic system.

Real star quality and performance.

Choosing the right hob to suit your kitchen and the way you want to cook is very important. The Electrolux range of hobs feature a stunning silver Induction model and a 'striking' flat design on gas hobs, as well as two new models with our flexible Dual Defendi 5kw burner for powerful wok cooking.

Gas hobs

A range of flat design gas hobs giving you great design lines coupled with safety and ease of use. Our gas hobs complement our range of ovens perfectly, with a flat design hob which is stylish and easy to use. All feature automatic ignition, flame safety devices and a selection of enamel or cast iron pan supports.

Electric hobs

Our range of ceramic hobs complement the oven range perfectly. The design is simple, yet elegant, perfect for today's modern kitchen. There is a choice of rotary control or touch control models and the range includes two induction hobs. All standard ceramic hobs feature rapid power zones which react in under 5 seconds, saving time and energy.

Dual Defendi wok burner

The new Dual Defendi wok burner gives you complete control and cooking flexibility. By turning the control knob to either the left or the right you can ignite just the centre section for everyday cooking and smaller pans or the whole burner achieving a 5kW rating - great for true wok cooking.

Triple crown wok burner

This is ideal for cooking the perfect stir-fry, giving you maximum heat, quickly and efficiently to ensure that your food is cooked perfectly.

Larger cooking capacity

On our 75cm hobs, there is now a 20% larger cooking area so you can fully utilise the cooking space on your hob, to include pots and pans even when using your wok, while still fitting into a standard 60cm cut out.

Easy clean

We have designed our hob range so that it is so easy to clean. Less dirt traps and tight corners and with the ceramic hobs the glass surfaces are easily wiped over.

With our ceramic hobs you can quite literally have fingertip control with our sleek front touch controls, ensuring precise temperature control. On selected products there is also a 99 minute timer, which saves you having to check the clock.

Additional safety features

Featuring integrated electronic ignition for easy lighting and residual heat indicators, that light up to show if the surface of the hob is still hot. The gas hobs all feature thermocouples, which ensure the gas is cut off if the flame is accidentally blown out. Your safety is paramount when cooking in your kitchen.

Fresher air and stunning designs.

The Electrolux range of cooker hoods is segmented into three levels, INSIGHT, INSPIRE & INTUITION, allowing you to create the look you are seeking, from a stunning focal point to being discreetly built into a cupboard.

The aesthetics of the Electrolux cooker hood range complement the other kitchen appliances as well as today's kitchen trends. The clever use of lighting including down lights and up lighters helps to create the perfect ambience for food preparation as well as dining.

Make your kitchen a pleasing and attractive place to be
Electrolux Pleasant Kitchen symbols will help you to easily choose the most appropriate cooker hood for the dimensions of your kitchen whilst removing unwanted vapour, airborne grease and odours from your kitchen.

To maximise the performance of the cooker hood it is essential to install the cooker hood with the correct size of ducting, this will enable the cooker hood to extract virtually all the vapour, cooking odours and airborne grease from the kitchen and keep the noise level to a minimum.

The measurements in each of the boxes relates to the floor space of the kitchen. This may help to ensure that you select the right hood for your kitchen that will deal with the vapour, airborne grease and odours.

Take your choice.

Island hoods

Island hoods are designed to be suspended over a central cooking island thus creating a dramatic focal point in the kitchen.

Chimney hoods

Chimney hoods are designed to provide a visual focus whilst offering various styles and widths to suit your kitchen. These are designed to perform well and please the eye.

Telescopic hoods

Ideal for the kitchen where the hood needs to perform well and be out of sight. These hoods are fitted into the wall cupboard and then pulled out from the wall when needed.

Canopy hoods

Canopy hoods are designed to fit snugly under a decorative canopy, kitchen unit or wall cupboard. These hoods save space and are discreet.

Integrated hoods

Appear to be part of the kitchen, hidden behind the furniture door and simply pulled out when required.

Traditional hoods

Traditional hoods fit neatly underneath a wall cupboard with easy to reach front controls.

INSIGHT

Award winning Freestanding cookers.

Are you a person who has a passion for cooking and loves to entertain friends and family with the result? Or a person who has a more practical view on cooking? If you are, why not look at Electrolux's wide range of cookers.

Choice and style

Our award winning range of appliances with design, functions, options and performance are in a class of their own. Innovative and visually stunning, our Insight cookers offer the widest choice. Electrolux offers the traditional cooking of gas, giving you flexible control and ease of cooking, the perfect performance of electric cooking with our touch or rotary controls, or you might prefer a combination of both with our dual fuel cookers.

Choice of widths

Available in a range of widths from 55cm, 60cm through to 100cm range cookers. We were thinking of you when we developed these appliances. Thinking of making your kitchen life more relaxed and fun.

55cm 60cm 70cm 90cm 100cm

Oven features

For fast and even cooking, electric cookers from the Insight range can offer you an Ultrafan® plus multifunction oven, in top of the range models, which will deliver you a range of ways to cook your food which are convenient to your lifestyle.

An Ultrafan® oven makes use of a fan to gently circulate the heat evenly around the oven. The fan is at the back of the oven surrounded by a heating element. This clever design gives faster heat up times, shorter cooking times at lower temperatures and an even cooking temperature throughout the oven. As well as being ideal for batch baking, or cooking on more than one shelf, it ensures there is no transfer of flavours, so sweet and savoury dishes can be cooked together.

Ultrazone oven

Our Insight gas cookers will give you flexible control and ease of cooking as well as a stylish designed cooker for your kitchen. The Ultrazone oven is great for cooking foods requiring different temperatures such as your Sunday roast and your Yorkshire puddings, as the oven is hotter at the top and cooler at the bottom. Perfect for your meal to be cooked all in one go.

Hob features

(R) Rapid power zones

Our ceramic hobs feature rapid power zones on top of the range models which heat up in under 5 seconds, saving time and energy.

Stop+Go function

Featured on the EKT6045X, this function is great for unexpected interruptions, as it automatically reduces all zones to the minimum heat level at the touch of a button.

Glass lid with auto cut off

Not only does the lid provide a useful splashback, the lid also provides the added safety feature of auto gas cut off when the lid is closed.

Cleaning features

Clean flush look

Our unique deep well designed gas hob and cooker knobs have also been designed to minimise the dirt traps and give a clean flush look to your cooker.

Inner door system

Through the clever design and construction of the inner door system, there is a removable full width and height inner door glass, for easier cleaning on both the top and main oven. The glass can simply lift out and wipe completely clean.

Catalytic liners - to help your oven stay clean

A special Catalytic coating is used on many of the ovens which absorbs any splashes during cooking to help keep the oven cleaner. When the oven is set to its highest temperature the special coating then helps clean off the splashes.

Safety features

Fan cooled doors

For added safety and comfort the oven doors are air cooled which reduces the surface temperature of the doors.

electrolux cooking 57

Residual heat indicators

On ceramic hobs the hot hob warning lights will come on if the hob becomes too hot. If the light is on, you know not to touch the hob.

All our gas and dual fuel cookers feature full gas safety devices and are suitable for apartments and multi-occupancy dwellings.
